### **DETAILED ACTION**

1. Applicant's arguments filed 9/30/08 have been fully considered but they are not persuasive.

Re Claims 19-28, Applicant argues that "centralized filtering and forwarding of data to be transmitted to remote" is not found in Arrowood U.S. Patent Number 5,987,521. Brederveld teaches a plurality of access points supporting 802.11 series for filtering and forwarding of data to be transmitted to remote. Further teaches a server coupled to the access points. What is not explicitly disclosed is the centralized filtering and forwarding. Arrowood teaches that cost and complexity can be reduced by centralizing the functions into a management node. In so doing, duplication of the functions would not have been necessary in each of the agent nodes. It is this teaching that would have motivated one skilled in the art to have centralized the filtering and forwarding functions of each access points into the server of Brederveld. In so doing, duplicates functions of the access points (802.11 series) would have been centralized thereby to reduce cost and complexity of the numerous access points.

2. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Andrew Lee whose telephone number is 571-272-3130. The examiner can normally be reached on Monday to Friday from 8:30AM to 6:00PM.
